The Masterpiece® Ventilation Collection & Pairing Guide
CLEAR THE AIR FOR MORE EXCEPTIONAL MOMENTS.

All Ventilation	*Hoods*	*Downdrafts*

- With unique features such as delayed shut-off and automatic mode, Thermador ventilation helps make every meal exceptional, enhancing the culinary experience.

- Thermador hoods feature multi-level, vivid LED lighting.

- The dishwasher-safe filter design makes it easy to keep your filters fresh.

- The Thermador Masterpiece® Series offers two filter types: perimeter filters increase efficiency by pulling air from the edges of the hood and speeding it up in the center; in stainless steel hybrid filters, grease-capturing mesh is protected by stainless steel.

- Thermador Noise Control & Noise Control Deluxe Ultra 6 ventilation is six times quieter than the average ventilation system, while Ultra16 is sixteen times quieter drastically reduces noise while hood is in use.

- Check grease filter and replace charcoal filter reminders will appear to indicate that the filters need to be cleaned or replaced.

- When paired with Freedom® Induction, Hood Sync features include:

  + The hood light automatically turns on when the cooktop is turned on.

  + The hood feature "automatic mode" can automatically activate once the cooktop is turned on, then the temperature sensor in the hood adjusts the blower speed according to the amount of heat sensed while cooking.

  + The hood features can be controlled / chosen on the TFT display of the Freedom induction cooktop. Now the cook can have one centralized location to control for two appliances that is easy to reach and easy to clean.

- Available with a 15" or 18" telescopic rise, as well as five discharge connections, including front recirculation, so you are not limited by kitchen design or pre-determined space.

- 18" downdraft also features LED light bars with two different light levels, providing optimal illumination for cooking or reading recipes.

Additional Options

Low-profile wall hoods

Cooktop-Hood Sync allows the cooktop and matching hood to communicate with one another to synchronize turning on task lighting and ventilation.

Custom inserts

Opt for either wall or island applications to suit your style and match your preference of cooking surfaces.

Under cabinet drawer wall hoods & Chimney Drawer hoods

Exclusive to Thermador, Masterpiece® Drawer hoods are a masterful blend of luxury and performance. Choose from a chimney drawer hood or the newly added under cabinet version, featuring an increased capture area, soft-close technology, and a design that fits within with the surrounding cabinetry.

Chimney wall hoods

The chimney height is adjustable to fit both high and low ceilings, so you have complete control over the aesthetics of your ventilation.

Island hoods

Sleek and slim, these meticulously sculpted, floating stainless steel island hoods catch the eye without obstructing views.

For optimal performance, the width of the hood should equal that of the cooktop or rangetop or exceed it by 3 inches on either side. Install these hoods only with Thermador Blowers.

†Also compatible with Pro Grand Ranges, Pro Harmony Ranges and Professional Rangetops.
