Star Dry™

THE MOST EXCEPTIONAL DRYING POWER IN THE WORLD

- Thermador Star-Sapphire and Sapphire dishwashers feature a two-step drying process with zeolite: a naturally occurring substance that generates heat when in contact with moisture.
- Located in the back of the tub, zeolite radiates heat throughout the unit to eliminate moisture without the use of chemicals, and with no need for replenishment.
- Zeolite reduces the need to towel dry items or leave them to air dry—even sturdy plastics and containers with hard-to-reach crevices.
- No other dishwasher dries better.
