

Oven Cooking Modes

Two Built In Oven Design Collections
Masterpiece Collection and Professional Collection
Two Feature Sets in Both Collections

Select Ovens 13 Cooking Modes
+Deluxe Ovens 16 Cooking Modes

Additional Deluxe Modes: +Max Broil +Max Convection Broil +Rotisserie (Upper)

The brand that invented Wall Ovens is reimagining culinary possibilities with its vast collection of high end ovens and a multitude of cooking conveniences.

Heating mode	Temperature °F (°C)	Use
 True Convection	150-525° (65-275°)	For baking and cooking small food items on one or more racks. The fan distributes the heat from the ring heating element in the back panel evenly around the oven cavity.
 Convection Bake	150-525° (65-275°)	Use for large baked items and breads on 1 or 2 racks. Also suitable for side dishes and casseroles. Heat is emitted from above and below while the fan distributes the heat evenly around the oven cavity.
 Bake	150-525° (65-275°)	For traditional baking and roasting on one level. Especially suitable for cakes on multiple racks. Heat is emitted evenly from the top and bottom.
 Convection Roast	150-525° (65-275°)	Roasting of poultry, larger pieces of meat and vegetables. Heat is emitted from above and below while the fan distributes heat evenly around the oven cavity.
 Roast	150-525° (65-275°)	For roasting poultry or meats. The heat is emitted from above and below.
 Warm	150-225° (65-110°)	For keeping cooked food warm.
 Speed Convection	150-525° (65-275°)	For frozen convenience foods. Heat is emitted from top and bottom while the fan circulates hot air around the food.
 Dehydrate	100-160° (40-70°)	For drying herbs, fruits and vegetables.

Note: Oven modes listed are primarily in reference to all 30" full size single and double Thermador wall ovens.

	Slow Roast	150-250° (65-120°)	For gentle slow cooking of seared, tender pieces of meat in ovenware without a lid. Heat is emitted evenly from the top and bottom at low temperatures.
	Max Convection Broil	450°-550° (230°-290°)	For thick tender cuts of meat, poultry and fish. Uses the larger broil element with the convection fan to allow for more food to cook at one time.
	Convection Broil	450-550° (230-290°)	For roasting poultry, whole fish and larger pieces of meat. The broil element and the fan switch on and off intermittently. The fan circulates the hot air around the food.
	Broil	450-550° (230-290°)	For broiling flat items, such as steaks or hamburgers, for making toast, and for cooking au gratin. The whole area under the broil heating element becomes hot.
	Pizza	150-525° (65-275°)	For preparing pizza fresh or frozen. Heat is emitted from above and below. The fan distributes the heat evenly around the oven cavity.
	Proof	85-110° (30-45°)	For yeast doughs and sourdough. Dough will rise considerably more quickly than at room temperature. The surface of the dough does not dry out.
	Rotisserie	175°-550° (80°-290°)	For roasting poultry and large pieces of meat. Food is slowly turned on a skewer. Uses heat radiated from the upper element.
	Max Broil	450°-550° (230°-290°)	For cooking thin, tender cuts of meat, poultry and fish. Uses the larger broil element to allow cooking more food at one time.

Note: Oven modes listed are primarily in reference to all 30" full size single and double Thermador wall ovens.
